

Accept payments
anywhere you
need to be

Where will your business take you?

Converge Mobile is an easy-to-use, flexible and secure mobile payment solution that allows you to take payments anywhere your business takes you. Converge Mobile uses an encrypted Ingenico iCMP PIN pad and is compatible with Android and iOS smartphones and mobile devices like tablets and iPads.

BE IN CONTROL

The interface is intuitive, easy-to-use and you can toggle from English to French whenever you like. Preset tax rates, include discounts or add gratuity to any transaction. These features are easy to configure and you can assign different rights per user. You can limit certain transactions (void/refund/etc...) to only particular employees, making it perfect for retail and service industries.

TAKE IT AND GO

Converge Mobile is the perfect solution to help you scale your business. Use it as your primary point-of-sale (POS) solution or as a back-up POS. Enable your sales people to serve customers throughout your store or send them on home visits and take payments wherever the job site happens to be.

ACCEPT PAYMENTS NO MATTER WHAT

With Converge Mobile, accepting payments is easy and reliable. Even if the power is out and the internet is down, you can still accept payments with Converge Mobile by utilizing your devices' data plan. Receipts can be printed using one of the available portable printers or emailed for your customers' convenience.

DON'T WORRY ABOUT A THING

Since Converge Mobile is on the secure Converge Payment Platform, you can rest assured that payment data is handled with the utmost care. Even if your device is lost or stolen, your customer's payment data is protected and your funding won't be delayed.

LET'S TALK:

Security Features

Converge Mobile has several built-in security measures to protect your customers and keep payment data safe. The App and iCMP both require a login to open. Transactions made by the iCMP are automatically and immediately submitted to Converge for processing. Card information is not stored on the iCMP or on your mobile device so in the event of loss or theft, your customer's payment information won't be compromised.

You have full control over the types of transactions your authorized Converge Mobile users can do. Simply assign the user rights as you see fit. Add, change or disable access to your Converge account whenever you like by logging into your Converge dashboard. With Converge Mobile, you're in control.

iCMP CARD READER: READY WHEN YOU ARE

- Connection options: wired and bluetooth
- Time until next charge: 3 days
- Transactions until next charge: 50
- Supported devices: Mobile smartphones, tablets operating on Google Android version 5.0 or above. iOS will be supported later this year.

AT-A-GLANCE FEATURES

- **Easy to set up and use.** Getting started is simple and the investment is minimal. If you already have a compatible mobile device, then simply download the app and get the iCMP. Set up your merchant account and you're ready to go.
- **Accept payments wherever you go.** Converge Mobile is perfect for businesses with moving sales people or for eCommerce businesses that need to accept in-person payments on occasion.
- **Security, meet mobility.** The dynamic duo in modern business is yours. With Converge Mobile you get the anti-fraud and security protection of an enterprise payment system and the ability to take payments anywhere.

SUPPORTED PRINTERS

Portable bluetooth printer offers convenient and compact printing on the go. Lightweight and durable with easy "drop and print" paper loading. The **SM-S220i** features an LCD display and convenient automatic sleep mode for extended battery life. The **SM-T300i** offers dust protection and splash-proof resistance that's rugged enough for use outdoors or other demanding payment environments.
